Profile

Computer Science Engineer (2026 graduate) with hands-on experience in full-stack web and application development. Skilled in building responsive user interfaces, REST APIs, database-driven applications, and real-world software projects using React, Spring Boot, JavaScript, Java, MySQL, MongoDB, and Firebase. Strong interest in practical problem-solving, application development, and learning modern software technologies.

Education

B.Tech in Computer Science and Engineering

College of Engineering Kidangoor

2022 – 2026

CGPA: 7.66/10

Plus Two – State Board

Emmanuel's HSS Kothanalloor

2020 – 2022

Percentage: 95%

Matriculation – State Board

Holy Ghost Boys High School Muttuchira

2017 – 2020

Percentage: 100%

Technical Skills

Programming Languages: C, Java, JavaScript

Frameworks: React JS, Spring Boot

Databases: MySQL, MongoDB, Firebase / Firestore

Tools & Platforms: GitHub, VS Code, Android Studio, Canva, Aiven, Vercel, Render

Projects

Tale Threads – Mini Project

HTML, CSS, JavaScript, Firebase

- Developed a responsive story-sharing platform for creating, managing, searching, and discovering stories.
- Implemented CRUD operations for creating, editing, updating, and deleting story content.
- Integrated Firebase for application data management and cloud-based storage.
- Added search and filtering functionality to improve story discovery and overall user experience.

Vaultx – Main Project

Flutter, Firebase, Google ML Kit (OCR), Gmail API

- Developed a document management application for organizing warranties, bills, and policy-related documents.
- Integrated Google ML Kit OCR to extract useful information from uploaded documents.
- Implemented Firebase and Firestore for cloud-based data storage and application data management.
- Built tracking dashboards and reminder functionality to help users monitor important documents and dates.

Market – Full-Stack E-Commerce Application

React, Spring Boot, Java, MySQL

- Developed a full-stack e-commerce application using React for the frontend and Spring Boot for backend development.
- Built REST APIs for product management and integrated frontend components with backend services.
- Implemented product browsing, categories, user authentication, and shopping cart functionality.
- Integrated MySQL hosted on Aiven Cloud for persistent storage of application and user data.
- Designed responsive interfaces for both desktop and mobile users and deployed the application using cloud platforms.

Certificates

- **Industrial Visit (IV) Certificate** – Suffix's Scope India
- **React Workshop (5 Days)** – One Team Solutions
